

Computing, Multimedia and Intelligent Techniques

Aims and scope

This multidisciplinary journal publishes reviewed, original research papers in all branches of modern computer and information sciences. The aim is to provide a forum for advanced works and critical analysis in these areas. Theory-oriented articles, papers on practical developments as well as state-of-the-art surveys and critical reviews of trends are welcome.

Areas of interest include (but are not limited to):

- computing (parallel/distributed processing, grids, collaborated, networked/wireless, networks, security),
- multimedia (audio, video, speech, musical, image, communication, medical, psychological and other signal processing: filtering, coding, transmission, estimation, detection, analysis, recognition, synthesis, compression, recording and reproduction),
- artificial intelligence (conventional and computational intelligence techniques: pattern recognition, knowledge engineering, expert systems, neural networks, fuzzy systems, evolutionary algorithms, hybrid systems),
- cognition (human-computer interaction and interfaces in smart environment, detection and tracking of live objects, understanding of images and scenes, live biometrics, psycho-technologies),
- applications in areas of physics, engineering, economics, medicine etc.

Instructions for authors

The language of the journal is English. Authors interested in submitting their papers should follow the instructions available at the journal website:

<http://cmit.icis.pcz.pl>

Submission of a paper implies that it has not been published previously, and it is not being considered for publication elsewhere. The authors are fully responsible for all information contained in their papers.

Only papers formatted according to the guidelines will be preliminarily accepted and committed to a reviewer. Papers which do not satisfy the formal requirements will be returned to the author. An acceptance letter will be sent to the leading author in case of the positive review of the paper. Before the accepted paper is published, the Copyright Transfer Agreement, which is available for download at the journal website, must be printed, filled and signed by the leading author and sent by mail or faxed to the editorial office.

The journal is published twice a year. Abstracts of all published papers will be available online. Publication of special issues is also possible and the proposals should be submitted to the editor-in-chief.
